

Collection of Transfer Course Data

PURPOSE: To announce the Summer 2022 collection of transfer course enrollment data

In support of Momentum Approach efforts to increase the number of students completing gateway English and Math courses in their first year of college, a new collection was conducted during Summer 2021 to extract transfer data for recently matriculated students.

In Summer 2022, for students who matriculated in the prior academic year, ITS will extract transfer course and grade data for 1000 and 2000 level ENGL, MATH and STAT courses. These data will be pulled by ITS over existing database links. Institutional course enrollment and grade data for Area A courses are collected in the Academic Data Collection and will not be a part of this special collection.

Additional details regarding this collection will be forthcoming.
